- a Healthy People 2020 (HP 2020) National Objective has not been established.
- National Objective is based on both underlying and contributing cause of death which requires use of multiple cause of death files.

California's data exclude multiple/contributing causes of death.

- c Prevalence data are not available in all California counties to evaluate the Healthy People 2020 National Objective STD-1, as the Health People objective is restricted to females who are 15-24 years old and identified at a family planning clinic, and males and females under 24 years old who participate in a national job-training program.
- d Data not available.

Note Crude death rates, crude case rates, and age-adjusted death rates are per 100,000 population. Birth cohort infant death rates are per 1,000 live births.

Age-specific birth rates are per 1,000 population.

County Previous refers to previous period rates. These periods vary by type of rate: Mortality 2007-2009, Morbidity 2007-2009, Infant Mortality 2006-2008,

Natality 2007-2009, Census 2010.
